CDAO Singapore is the leading event for data and analytics leaders in the APAC region.

Our 2019 event boasts an inspiring speaker line-up with a really comprehensive agenda covering the biggest strategic concerns for leaders in the data and analytics space. CDAO Singapore will draw together senior executives responsible for championing the data agenda, to share insights on the infrastructure, governance, privacy, innovation, culture and leadership required to effectively harness data as a strategic asset.

Discover how Chief Data and Analytics Officers are driving change and shaping their organisations to become analytically mature, business-driven enterprises that outperform their competitors. With over 200 Data Analytics executives in attendance and an expert speaker faculty bringing together international and local leaders, this event will be a unique meeting place to discuss strategic objectives for 2020 and beyond.

Key themes will address:

- How Artificial Intelligence can be Ethically and Responsibly Used –sound approaches to data management and the governance of AI and other frontier technologies.
- Embedding a Culture of Data Analytics and Insight Based Decision Making–democratising analytics to foster insight and co-operation throughout the organisation.
- Advancing Businesses and the Economy–How to ensure AI is core to corporate strategy and business models and supporting data driven decision making across the enterprise with robust and evolved data strategies.
- Future Data Talent – Understanding innovative approaches to data staff training, increasing expertise and building effective teams.
